

Amendments to the Specification (other than claims):

Please replace paragraph [0057] with the following amended paragraph:

[0027] The first inner peripheral face 225b1 that composes the first capillary seal section 238a forms a first angle θ_1 with respect to the rotation axis X, the angle θ_1 taking an angle value of ~~$0 \leq \theta_1 \leq 90^\circ$~~ $0 < \theta_1 \leq 90^\circ$. Further, the second inner peripheral face 225b3 that composes the second capillary seal section 238b forms a second angle θ_2 with respect to the rotation axis X, the angle θ_2 taking an angle value of ~~$0 \leq \theta_2 \leq 90^\circ$~~ $0 \leq \theta_2 < 90^\circ$. The relationship between the first angle θ_1 and the second angle θ_2 is $\theta_1 > \theta_2$.
